Notice to PCB Supply Factories

Thank you for your interest in becoming a supplier to Tecbridge Circuits.

We are a small specialist PCB supplier serving UK and European markets. We aim to be best supplier in terms of technical quality, technical service and price.

We believe the best way to achieve our goals is to work with a very small number of supply factories whose capabilities and style we know very well. We will not risk working with new supply factories whose reliability and technical quality are unknown and untested, however good they may be.

We are currently receiving 100's of emails each week and several telephone calls every day from overseas factories trying to work with us. It is impossible for us to engage with you individually and we respectfully request you do **not** call us because it distracts our staff from dealing with our customers. We cannot give you any further information than is contained in this notice.

In the future we may need to engage one or more additional suppliers due to capacity, technically specialised requirements or other reasons and we welcome you to contact us **only** by email mentioning the key specialities of your company. Please note we do not individually acknowledge email from potential suppliers because we receive far too many enquiries to respond to individually.

If you observe the following rules we will keep your information on file for possible future use:

- 1) Under **no** circumstances contact us by telephone
- 2) Do **not** email us more than once per month, otherwise we will add your email to an automated black list.

We have a great respect for Chinese manufacturing capability and have a long history of successful collaboration with our colleagues in China. Unfortunately we are now having to take steps to protect us and our staff from excessive time lost spent handling enquiries from potential suppliers and we thank you for your understanding in observing the above rules when contacting us.

William J Gibson
